

PERFORMANCE UPDATE

Security Life of Denver Insurance Company

Corporate VUL

Average Annual Total Returns as of: 02/28/2023 (shown in percentages)

The following variable investment options are available through the variable universal life insurance policy identified above and this performance update illustrates their performance. Variable universal life insurance combines the protection and tax efficiencies of life insurance with the investment potential of a comprehensive selection of variable investment options. The insurance component provides the death benefit coverage and the variable component provides the flexibility to potentially increase the policy's cash value.

The performance data quoted represents past performance. Past performance does not guarantee future results. Actual investment returns and principal value will fluctuate so that shares and/or units, at redemption, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month-end please call 877-886-5050.

The returns shown assume reinvestment of all dividends and reflect the deduction of all portfolio fees and expenses, including investment management fees, distribution (12b-1) fees and other expenses. Returns do not reflect the deduction of the variable universal life insurance policy's fees and charges, including the fees and charges for the cost of insurance, mortality and expense risks, taxes, sales, policy administration, transaction processing and any optional benefits. If these fees and charges were deducted, the performance shown would be significantly lower. Contact your registered representative to obtain a personalized policy illustration, which will show performance reflecting all applicable variable universal life insurance policy fees and charges.

This material must be preceded or accompanied by a prospectus for the variable universal life insurance policy. Before investing, carefully consider the investment objectives, risks, and charges, and expenses of the variable universal life insurance policy and each underlying variable investment option. This and other information contained in the prospectuses for the variable universal life insurance policy and the underlying variable investment options. Obtain these prospectuses from your registered representative or call and read them carefully before investing.

Returns less than one year are not annualized. Fund Inception Date is the date of inception for the underlying fund, and is the date used in calculating the periodic returns. This date may also precede the portfolio's inclusion in the product.

The risks of investing in small company stocks may include relatively low trading volumes, a greater degree of change in earnings and greater short-term volatility.

Foreign investing involves special risks such as currency fluctuation and public disclosure, as well as economic and political risks.

Some of the Funds invest in securities guaranteed by the U.S. Government as to the timely payment of principal and interest; however, shares of the Funds are not insured nor guaranteed.

High yielding fixed-income securities generally are subject to greater market fluctuations and risks of loss of income and principal than are investments in lower yielding fixed-income securities.

Sector funds may involve greater-than average risk and are often more volatile than funds holding a diversified portfolio of stocks in many industries. Examples include: banking, biotechnology, chemicals, energy, environmental services, natural resources, precious metals, technology, telecommunications, and utilities.

PERFORMANCE UPDATE

Security Life of Denver Insurance Company

Corporate VUL

Average Annual Total Returns as of: 12/31/2022 (shown in percentages)

The following variable investment options are available through the variable universal life insurance policy identified above and this performance update illustrates their performance. Variable universal life insurance combines the protection and tax efficiencies of life insurance with the investment potential of a comprehensive selection of variable investment options. The insurance component provides the death benefit coverage and the variable component provides the flexibility to potentially increase the policy's cash value.

The performance data quoted represents past performance. Past performance does not guarantee future results. Actual investment returns and principal value will fluctuate so that shares and/or units, at redemption, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month-end please call 877-886-5050.

The returns shown assume reinvestment of all dividends and reflect the deduction of all portfolio fees and expenses, including investment management fees, distribution (12b-1) fees and other expenses. Returns do not reflect the deduction of the variable universal life insurance policy's fees and charges, including the fees and charges for the cost of insurance, mortality and expense risks, taxes, sales, policy administration, transaction processing and any optional benefits. If these fees and charges were deducted, the performance shown would be significantly lower. Contact your registered representative to obtain a personalized policy illustration, which will show performance reflecting all applicable variable universal life insurance policy fees and charges.

Returns less than one year are not annualized. Fund Inception Date is the date of inception for the underlying fund, and is the date used in calculating the periodic returns. This date may also precede the portfolio's inclusion in the product.

The risks of investing in small company stocks may include relatively low trading volumes, a greater degree of change in earnings and greater short-term volatility.

Foreign investing involves special risks such as currency fluctuation and public disclosure, as well as economic and political risks.

Some of the Funds invest in securities guaranteed by the U.S. Government as to the timely payment of principal and interest; however, shares of the Funds are not insured nor guaranteed.

High yielding fixed-income securities generally are subject to greater market fluctuations and risks of loss of income and principal than are investments in lower yielding fixed-income securities.

Sector funds may involve greater-than average risk and are often more volatile than funds holding a diversified portfolio of stocks in many industries. Examples include: banking, biotechnology, chemicals, energy, environmental services, natural resources, precious metals, technology, telecommunications, and utilities.

Additional Notes

(1) YOU COULD LOSE MONEY BY INVESTING IN THE FUND. ALTHOUGH THE FUND SEEKS TO PRESERVE THE VALUE OF YOUR INVESTMENT AT \$1.00 PER SHARE, IT CANNOT GUARANTEE IT WILL DO SO. AN INVESTMENT IN THE FUND IS NOT INSURED OR GUARANTEED BY THE FEDERAL DEPOSIT INSURANCE CORPORATION OR ANY OTHER GOVERNMENT AGENCY. THE FUND'S SPONSOR HAS NO LEGAL OBLIGATION TO PROVIDE FINANCIAL SUPPORT TO THE FUND, AND YOU SHOULD NOT EXPECT THAT THE SPONSOR WILL PROVIDE FINANCIAL SUPPORT TO THE FUND AT ANY TIME.

(2) Voya Retirement Growth Portfolio - Institutional Class: The adviser is contractually obligated to limit expenses to 0.82% through May 1, 2018. The limitation does not extend to interest, taxes, investment-related costs, leverage expenses, and extraordinary expenses. This limitation is subject to possible recoupment by the adviser within 36 months of the waiver or reimbursement. Termination or modification of these obligations requires approval by the Portfolio's board.

(3) There is no guarantee that any investment option will achieve its stated objective. Principal value fluctuates and there is no guarantee of value at any time, including the target date. The "target date" is the approximate date when you plan to start withdrawing your money. When your target date is reached, you may have more or less than the original amount invested. For each target date Portfolio, until the day prior to its Target Date, the Portfolio will seek to provide total returns consistent with an asset allocation targeted for an investor who is retiring in approximately each Portfolio's designation Target Year. Prior to choosing a Target Date Portfolio, investors are strongly encouraged to review and understand the Portfolio's objectives and its composition of stocks and bonds, and how the asset allocation will change over time as the target date nears. No two investors are alike and one should not assume that just because they intend to retire in the year corresponding to the Target Date that that specific Portfolio is appropriate and suitable to their risk tolerance. It is recommended that an investor consider carefully the possibility of capital loss in each of the target date Portfolios, the likelihood and magnitude of which will be dependent upon the Portfolio's asset allocation. On the Target Date, the portfolio will seek to provide a combination of total return and stability of principal.

The Voya Solution / Target Date PortfoliosSM are actively managed and the asset allocation adjusted over time. The portfolios may merge with or change to other portfolios over time. Refer to the prospectus for more information about the specific risks of investing in the various asset classes included in the The Voya Solution / Target Date PortfoliosSM.

Stocks are more volatile than bonds, and portfolios with a higher concentration of stocks are more likely to experience greater fluctuations in value than portfolios with a higher concentration in bonds. Foreign stocks and small and midcap stocks may be more

See Performance Introduction Page for Important Information

Additional Notes

volatile than large cap stocks. Investing in bonds also entails credit risk and interest rate risk. Generally investors with longer timeframes can consider assuming more risk in their investment portfolio.

(4) Fund closed to new investments.

(5) The current yield reflects the deduction of all charges that are deducted from the total return quotations shown.

Variable insurance products are issued by Security Life of Denver Insurance Company and distributed by SLD America Equities, Inc., 7535 East Hampden Ave, Suite 400, Room 446, Denver, CO 80231.

The chart shows the performance for each investment option for the time periods shown.

Separate Account charges may be lower for your account and a Maintenance Fee may or may not apply to your account. A DSC may or may not apply to your account.

Investment Options are listed in asset class order, each of which has unique risk characteristics.
